Advanced Energy Works for California

After spending more than 5 years in the solar industry, Rosa Davies took a leap to further her career and joined EVgo in December 2017. Initially, she was brought on as a project manager, but in time, her ability to network and interest in business development led her to join the Site Development team. As a site developer, Rosa initiates relationships with property and business owners across the Los Angeles basin with the goal of bringing awareness to the future of electric mobility.

On a day-to-day basis, Rosa performs site walks, confirms site designs, negotiates contract terms for electric vehicle charging stations, oversees the execution of each contract, and maintains a long and healthy relationship with each host.

Today, over 70 people work for EVgo in the U.S., with at least half based in California. Over 90% of Californians live within 35 miles of an EVgo Freedom (charging) Station in California and we will continue to close that gap within the next few years with projects such as Drive the Arc. Drive the Arc is a corridor that places 55 EVgo fast chargers between Monterey and Lake Tahoe. This project was made possible with the help of the state of California, Nissan, and NEDO.

Separate from her professional career, Rosa became a LEED associate in 2016 and a building performance analyst (BPI) in 2017. In 2010 Rosa graduated from California State University of Northridge (CSUN) with a B.S. in Business Management.

EVgo
Site Development Manager
Los Angeles

“At EVgo we always talk about how our work will affect not only ourselves and our industry, but the future health of our planet. I'm lucky to have my passion be a part of my work.”

- Rosa Davies, EVgo

Advanced Energy Works
A movement of advanced energy workers and supporters to make advanced energy grow, create millions of jobs, and strengthen our economy in communities across America.
