

Advanced Energy Works for Colorado

Matthew Crosby oversees nationwide solar market policy strategy development and implementation at Coronal Energy. Coronal Energy is a leading independent power producer focused on large-scale solar and storage projects for diverse customers across North America, including utilities, corporations, and the public sector. He received his Master of Science in Urban Planning at Columbia University, where he focused on energy policies. He has over 10 years of experience in utility regulation, operations, and smart city and solar project development. Previously, he worked at the California Public Utilities Commission, Austin Energy, and the Rocky Mountain Institute.

In Colorado, Matthew's primary focus is on supporting the Colorado Energy Plan at the PUC, and on policies that will standardize utility assessment of uneconomic, aging generation resources as part of the integrated resource planning process, qualifying facility policy, and building demand for battery energy storage.

With 3 GW of completed project experience and the financial strength of a Fortune Global 500 company (#114) in parent Panasonic, Coronal Energy owns and manages a 333 MW operating portfolio and a multi-gigawatt development pipeline in more than 20 U.S. states. Coronal Energy has 100 employees throughout the United States.

Advanced Energy Works

A movement of advanced energy workers and supporters to make advanced energy grow, create millions of jobs, and strengthen our economy in communities across America.
