

Advanced Energy Works for Florida

Gabriel De Paz is a field energy consultant at Sunrun. His mission is making the Sunshine State live up to its name. Gabriel's passion is helping Florida reach a sustainable future as quickly as possible. To do so, he works to educate homeowners in Florida about the benefits of solar energy systems.

Gabriel graduated cum laude from Appalachian State University with a degree in appropriate technology and a minor in sustainable development. He served on the board of the Renewable Energy Initiative, and served the United Solar Initiative during the installation an off-grid solar photovoltaic/battery-backup system in rural Nicaragua. He also worked in the biofuels industry in North Carolina and the solar market in California. With the arrival of net-metering policy, he returned to his home state to work for Sunrun.

Sunrun is the largest dedicated residential solar company in the United States. In collaboration with its certified partner network, Sunrun helps homeowners get solar energy that is perfect for their home and lifestyle, simply and quickly. Sunrun has deployed more than \$4.6 billion in solar systems with support and has raised more than \$300 million in venture capital.

GABRIEL DE PAZ

Sunrun
Field Energy Consultant
Orlando

"This is the Sunshine State; let's live up to the name. Utilizing the millions of sunbaked rooftops is a no-brainer — especially when it creates thousands of jobs and saves homeowners thousands of dollars."

- GABRIEL DE PAZ, SUNRUN

Advanced Energy Works

A movement of advanced energy workers and supporters to make advanced energy grow, create millions of jobs, and strengthen our economy in communities across America.
