

Advanced Energy Works for Michigan

Albert Jongewaard joined Apex Clean Energy in November 2016 and is responsible for managing community engagement efforts and building support for utility-scale wind energy projects in Michigan and the upper Midwest. After graduating from Texas Christian University with a degree in international relations, Albert began his career in campaign politics and served as a volunteer coordinator, finance director, and campaign manager on multiple campaigns in Alabama, Minnesota, Mississippi, and New Jersey.

In 2010, Albert had his first experience with the energy sector while representing the communities of Dauphin Island and Bayou La Batre in Alabama during the BP Deepwater Horizon oil spill response and recovery. Following his time on the Gulf Coast, Albert worked in Birmingham, Alabama, managing politically sensitive public affairs issues and economic development initiatives for clients across diverse industry sectors, state agencies, and industry trade groups.

In Michigan, Albert is working on Apex's 400 MW Isabella Wind project, which would generate enough clean electricity to power more than 93,000 U.S. homes. Apex Clean Energy develops, constructs, and operates utility-scale wind and solar power facilities across North America. Apex's mission-driven team of more than 200 renewable energy experts uses a data-driven approach and an unrivaled pipeline of projects to create solutions for the world's most innovative and forward-thinking customers.

ALBERT JONGEWAARD

Apex Clean Energy
Public Affairs Manager
Isabella County

"I love my job, and I find satisfaction knowing that we're providing local communities with incredible opportunities to think big about their own futures."

- ALBERT JONGEWAARD,

Advanced Energy Works

A movement of advanced energy workers and supporters to make advanced energy grow, create millions of jobs, and strengthen our economy in communities across America.
