

Advanced Energy Works for Michigan

Dave Shiftlett joined Geronimo Energy LLC in the spring of 2010, originally as a consultant and now as Project Manager for the Eastern Region. In this role, he leads all facets of project development for Geronimo in Michigan. Prior to working for Geronimo, Dave acquired development lands for a utility-scale developer in South Dakota. Dave has 20+ years of real estate development experience, including in Oil and Gas as well as in Brownfield re-development. He has also enjoyed the opportunity to serve his community as a four-term County Commissioner in Leelanau County. Dave and his family live on the beautiful Leelanau Peninsula in Northern Michigan.

Geronimo Energy is an independent power producer specializing in utility-scale wind, solar and storage, across the United States and Puerto Rico. Their comprehensive development capabilities include real estate, sales, marketing, resource assessment, meteorology, project management, transmission, energy policy, land use regulations, finance and environmental services. This skill set allows Geronimo to identify, market, and develop fully permitted and construction-ready renewable energy projects. Geronimo Energy has over 2 gigawatts of operating projects and a pipeline over 5 gigawatts and growing daily. The company employs approximately 75 people.
