

Advanced Energy Works for Minnesota

Anthony Fair joined the Rural Renewable Energy Alliance (RREAL) and REAL Solar Team in 2017 to help meet the high demand for solar installations the company has been experiencing. Anthony was quickly promoted to Site Supervisor due to his high caliber work.

Anthony first began working with REAL Solar as an intern from the Leech Lake Tribal College through the Integrated Residential Builder program. He gained 320 hours of hands-on experience installing solar photovoltaic panels for the first-ever community solar project integrated with the Low-Income Home Energy Assistance Program in Minnesota and on tribal lands. Upon graduating with an Associate Degree in carpentry, REAL Solar invited him to join the team full time.

RREAL is a nonprofit dedicated to making solar energy accessible to everyone, regardless of income. Their team is currently 19 Minnesotans strong and growing! RREAL has completed over 500 low-income solar installations across 11 states, including partnerships with Habitat for Humanity, schools, and First Nations.
