

Advanced Energy Works for Nevada

Annette Corbo is an installation coordinator at Sunrun. Originally from California, Annette always passionately believed in the positive economic and societal impacts of advanced energy. However, she did not know much about Sunrun when she began. She simply loved the company's mission and the fact that it is run by a woman.

Annette began her career with the company in 2015 as a branch coordinator working to ensure customers were satisfied with their installed solar projects. Her role was crucial to ensuring the new company successfully met customer demands. Eventually, she began working as a project scheduler, where she organized and maintained a scheduling system to support identified projects and their plans.

As she gained more experience, she began to take on more responsibility. Now in her current role, Annette has helped over 2,200 customers work with NV Energy to install projects and receive proper inspections and permits.

Sunrun is the largest dedicated residential solar company in the United States. In collaboration with its certified partner network, Sunrun helps homeowners get solar energy that is perfect for their home and lifestyle, simply and quickly. Sunrun has deployed more than \$4.6 billion in solar systems with support and has raised more than \$300 million in venture capital.

Advanced Energy Works

A movement of advanced energy workers and supporters to make advanced energy grow, create millions of jobs, and strengthen our economy in communities across America.
