

Advanced Energy Works for Nevada

Breanna Larrazolo began her career in clean energy when she joined SolarCity (now Tesla) in 2008 working out of Foster City, California. Over the last 10 years, she has moved multiple times for Tesla as the company needed her in different roles. She moved to Las Vegas for the first time in mid-2013 to help recruit and train the first Nevada teams in customer support. In January 2014, Breanna was promoted to an energy advisor role. When Nevada's solar market virtually shut down (due to policy challenges) in December 2015, Breanna worked hard to bring solar back. She took a leadership role back in the San Francisco Bay Area during the solar hiatus that continued into 2017. In July 2017, Breanna moved back to Las Vegas when AB 405 was signed by the governor – reviving the solar industry.

Breanna graduated from the University of Santa Barbara with a Bachelor of Arts in Communications, which has been useful as she shares the mission of Tesla with hundreds of customers. Her influence is not only felt in the Las Vegas community but also globally. In September 2014, Breanna visited Nepal through the GivePower Foundation. She worked with other clean energy advocates to install solar on three schools in two small villages that did not have access to electricity.

Tesla's mission is to accelerate the world's transition to sustainable energy. Tesla builds not only all-electric vehicles but also infinitely scalable clean energy generation and storage products.

Advanced Energy Works

A movement of advanced energy workers and supporters to make advanced energy grow, create millions of jobs, and strengthen our economy in communities across America.
