

Advanced Energy Works for New Mexico

Jonathan Teran has been with Affordable Solar since 2017 and started on the installation crew. Both the management team and his coworkers took notice of his knack for time management, problem solving, and customer service. When an opening became available in the service department, Jonathan applied for the position and was rewarded with a promotion.

Jonathan brings curiosity and an incredible work ethic to the service team. He has a smile in even the most challenging circumstances and is always willing to take the time to talk to customers and explain exactly what is going on with their solar energy systems. In the time Jonathan has been Affordable Solar's lead service technician, timelines have been reduced by 50% and customer satisfaction has improved dramatically.

Affordable Solar was founded in 1998 in Albuquerque to sell solar equipment. The company started its construction division in 2010 and since that time have served more than 2,200 families in New Mexico, installing over 100 megawatts (MW) of solar (more than 330,000 solar panels). As the largest solar installer in New Mexico, the company prides itself on helping employees have careers, not just jobs. Its training and development programs allow employees to meet their personal goals and give the company the opportunity to hire from within for higher level positions, all while advancing renewable energy in New Mexico.

Affordable Solar
Service Technician
Albuquerque

"It's amazing to be a part of an industry that isn't just growing economically but also provides an alternative energy source for consumers, one that isn't harmful to our planet."

- JONATHAN TERAN, AFFORDABLE SOLAR

Advanced Energy Works

A movement of advanced energy workers and supporters to make advanced energy grow, create millions of jobs, and strengthen our economy in communities across America.
